TRANSPLAN MIDWAY CONFERENCE PROGRAMME

Dear participant.

Let's make the most of our time, working and learning together at this mid point in the Transplan project!

Please check the programme to ensure you are clear on your role and input.

Louise Lyng Bojesen, Project Leader & Bengt-Olof Grahn, Gotland

Sunday April 26

20:00 *Dinner at O' Leary's Pub on Strandgatan in Visby old town and discussions around the table*

Monday April 27 - Conference Day

CONFERENCE MORNING

- In the morning session we will focus on sharing information and experiences from the islands.
- Please be sure to prepare your slides so you will speak no longer than 15 minutes.
- Make the slides simple and ready to be published on the homepage after the meeting.
- Remember to use the Transplan and the EACI logo (see homepage: (http://ec.europa.eu/energy/intelligent/implementation/communication_en.htm#logo)).

08:00 Presentation and a short walk around the environmentally certified hotel

08:30 Short introduction of the Midway Conference (Bengt-Olof)

08:40 **WP1:** Administration and coordination of Transplan (Louise)

09:00 All partner and observer islands present shortly their work so far and ideas for future work. Max 15 min.

12.00 *Lunch at Borgen*

CONFERENCE AFTERNOON

- In this session we will focus on discussions on the contents in the different workpackages, evaluation of the workpackages so far, our obligations according to the contract and how to work and exchange experience in the future.

Per Alex, Henrik, Vivi and Panos - please be ready to lead the discussions.

- 13.00 **WP2:** Discussions on the process so far and this years update of the energy balances. Evaluation of the EPT-tool and the additional directions. Evaluation of involvement of observer islands (Per Alex)
- 14.00 **WP3:** Discussions on implementation. Formation of Trans-island-implementation groups. (Henrik)
- 15.00 Short break
- 15.15 **WP4:** Discussions on how to involve ambassadors. Exchange of experience. (Vivi)
- 16.00 **WP4:** Discussions on homepage, brochure and international dissemination activities (Panos)
- 17.00 Conclusions so far – things to improve in the rest of the project (Louise)
- 17.30 End of session
- 19:00 *Dinner at **Strand Hotel***
-

Tuesday April 28 - Study tour day

- 08:00 We walk to Kruttornet and the bus will pick us up for the trip
- 08:30 Tofta Gården, solar and wood chip heated hotel, We listen to Mr Göran Göransson who explains the benefits of renewable energy in the hotel. Coffee break before we leave and we pick up our lunch bags for the day.
- 10:00 Klinte pellet factory, Hans Klintbom, director of the company Gotland's Pellets AB shows us around in the factory.
- 12:00 We visit the windmill park in Näs and, the guide shows us the latest generation (new windmills replace older ones) project.
- 13:00 Lunch by the roadside - don't forget the packed lunch!.*
- 14:30 We visit the new private biogas plant under construction in Alva, Magnus Ahlsten, farmer, tells us about his biogas plans.
- 16:30 Our technical director, Bertil Klintbom, shows the energy efficient library in Visby and tells us about the EU project that was the start of the library.
- 19:00 *Dinner at **Clarion Hotel***
-

Wednesday April 29 - Conclusions day

CONCLUSIONS, DECISIONS & FINAL REPORTING.

- 08:30 Extra time for final clarification on tasks, decisions, agreements.
- 09.30 Production of report and newsletter from midway meeting
- 11:00 End of Conference
- 11.30 *Lunch at **Kalas***

Bornholm, Denmark

Bornholm Regionskommune, BRK, the Regional Municipality of Bornholm, is the local and regional public administration of Bornholm. Bornholm has accepted the "green island concept" as its guiding objective. Since the mid 80's the island has encouraged the use of renewable energies and has promoted energy savings.

Louise Lyng Bojesen

Louise.Lyng.Bojesen@brk.dk
www.brk.dk

PlanEnergi, Denmark

PlanEnergi is a consultancy company organised as a foundation. The company's objective is to promote the efficient use of resources and the conservation of the environment. PlanEnergi will provide support to Bornholm and training to the participating islands.

Per Alex Sørensen

pas@planenergi.dk
www.planenergi.dk

ISLENET

ISLENET is a network of European Island Authorities, which promotes sustainable and efficient energy and environmental management. Islenet is charged with the dissemination of the project.

Panos Coroyannakis

islenet@skynet.be
www.islenet.net

Gotland, Sweden

Gotland is the largest island in Sweden. Gotland has developed a number of interesting and innovative examples of renewable energy initiatives that have contributed to making the energy production in Gotland more sustainable.

Bengt-Olof Grahn

bengtlof.grahn@gotland.se
www.gotland.se

Åland Islands, Finland

The Åland Islands form an autonomous, demilitarized and unilingual Swedish province of Finland. The government of Åland strives to coordinate and create possibilities for increased use of renewable energy systems. Today, one of the most important aims is to reduce the use of fossil fuel.

Henrik Juslin

henrik.juslin@regeringen.ax
www.aland.ax/alandinbrieif

Saaremaa, Estonia

The Saaremaa County Government is the state's representative in the region. It is responsible for the balanced and sustainable development of Saaremaa. The Saaremaa County Government has been very active in the field of energy and has promoted ideas and projects in accordance with its strategy and action plan. Saaremaa's commitment stems mainly from the fact that it is an isolated area and its vision for the future should be total self-sufficiency in the field of energy.

Punto Energia Provincia di Sassari (PEPS)- Multiss S.p.a. Sardinia, Italy

Punto Energia Provincia di Sassari - Multiss S.p.a. (PEPS) is a technical structure providing services to local communities, small and medium enterprises and citizens in the field of energy policy and sustainable development. The Agency is in charge of carrying out the energy policy at territorial level and promoting innovation activities in the energy sector. It is also involved in energy savings projects, energy efficiency and the development of renewable energies.
